

## Risk-factor

- The Client stands informed that the Asset Manager is not responsible for risks originating with exchange systems, and that direct or indirect financial losses occurring as a result of technical problems, security breaches, hacking attacks, blocking of funds, as well as force majeure circumstances, including but not limited to military force, terrorist attacks, natural disasters, trading freezes on financial markets, capital controls and interventions, government actions or legislation, financial market instability resulting in sudden liquidity reductions, and other significant changes to counterparty operations.
- The Asset Manager is not responsible for client losses occurring due to temporary or persistent insolvency on the part of or blocking by exchanges.
- The Client stands informed that trading operations on digital asset (cryptocurrency) markets are inherently risky and may lead to financial losses as well as gains.
- The Asset Manager cannot guarantee financial gains as a result of the Asset Manager's operations with the client's portfolio.
- The Client stands informed about the inherent high systemic risks of trading platforms.
- The Client is to deposit and withdraw funds and digital assets of their own volition.
- The Client is to undergo all legally applicable KYC and AML verification procedures and provide the Asset Manager with documentation attesting to the Client having done so.
